
Scaling up renewable heating and cooling

RENEWABLE THERMAL COLLABORATIVE

Membership Prospectus

Who We Are

The Renewable Thermal Collaborative (RTC) is the global coalition of companies, institutions, and governments committed to decarbonizing thermal energy use by scaling up renewable heating and cooling technologies at their facilities.

The RTC is co-convened by the Center for Climate and Energy Solutions (C2ES), David Gardiner and Associates (DGA), and the World Wildlife Fund (WWF).

Why You Should Join

The RTC includes over 110 Members and Solutions Providers from US and global companies across a diverse range of industries, including leaders in the food and beverage, pharmaceutical, consumer packaged goods, paper, healthcare, higher education, building materials, and automotive sectors.

Members engage in peer-to-peer learning, develop case studies, and overcome common barriers to project implementation through unique convening opportunities and workstreams exclusive to RTC Members and Solutions Providers.

Our Long-Term Vision

The RTC works with large energy buyers; producers of renewable thermal technologies and service providers; non-profits; federal, state, and local governments to:

- Identify market barriers and viable solutions to implementing renewable thermal technologies;
- Educate all parties about the urgent need to address renewable options for thermal energy;
- Enable the delivery of cost-competitive renewable thermal options;
- Improve the marketplace and financing for renewable thermal technologies; and
- Develop a long-term vision for scaling up renewable thermal technologies in the United States and around the world.

For more information, contact Perry H. Jones, RTC Membership Director at perry@dgardiner.com

Membership Benefits

RTC Membership - \$10,000 annually

State and local governments and universities may join at no cost.

The Renewable Thermal Collaborative is a Member-driven organization. RTC Members collectively play a critical role in determining the organization's strategic initiatives, and provide foundational support to the work.

Roles and opportunities for Members include:

- Providing expertise and perspectives to the RTC community about thermal goals and projects, roadblocks, and successes you've had or lessons you've learned along the way;
- Uncapped company participation in an unlimited number of workstreams covering a wide range of technology, policy, and market topics;
 - Electrification
 - Geothermal
 - Green Hydrogen
 - Industrial Heat Pumps
 - Market-Based Accounting
 - Policy
 - Renewable Natural Gas
 - Solar Thermal
 - Thermal Energy Storage
- Collaborating in monthly RTC Community Calls, including introduction at first Community Call;
- RTC social media & newsletter announcements on joining;
- Priority for speaking opportunities at events and RTC webinars;
- Authoring case studies for RTC dissemination;
- Discounted and priority registration for the annual RTC Summit in Washington, D.C.;
- Participate in annual RTC Partnership Workshop;
- Company logo featured on: RTC event signage and materials, RTC newsletter and webinars, select reports and other deliverables, RTC Buyers Statement.
